

Our Poles

Our resources are a tool to educate our engineers, agents, distributors, contractors, end-users and more. Each of these persons may be more inclined to learn about one thing than the other.

- The **engineering community** will want to learn about: the benefits of aluminum, powder coating procedures, the galvanizing process, etc.
- The **agents and distributors** will want to learn about: the benefits of aluminum, pole glossary, purchase order checklist, quotation checklist, etc.
- The **contractors** will want to learn about: bolt square and bolt circle guide, installation guide, etc.
- The **end-users** will want to learn about: the benefits of aluminum, fixture orientation, powder coating procedures, the galvanizing process, etc.

Ultimately, these tools are available to make the lives easier for our customers. If you have any further questions or comments regarding additional resource tools that should be available, please contact us at 1.866.874.8889 or sales@novapole.com and we'll be sure to make it available.
